WOLFE AND MADISON STREETS
BALTIMORE : : : MARYLAND

March 3, 1942.

Executive Committee,
Friends of the Army Medical Library,
Army Medical Library,
Washington, D. C.

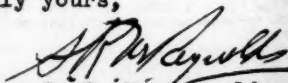

Sirs:

Will you kindly send word concerning the Current List to: Dr. Willard M. Allen, Professor of Obstetrics and Gynecology, Washington University School of Medicine, St. Louis, Missouri.

It is my belief that, in spite of your efforts at publicity, most of my scientific colleagues do not know what the Current List is, and more particularly, how it can be useful to them. This was true in New York, and I have found it equally true here in Baltimore where I have recently located. Once the features of the List are made clear, in a one, two, three fashion, genuine interest is aroused.

I am sure that many subscribers have written to say how they have found the list most helpful. To these may I add the way I have found it useful? This is as follows: I scan virtually the entire list each week. This requires about forty-five minutes. I make three types of marginal notations. Those articles on subjects in which I have a continuing interest receive a single check; those which are of immediate interest, and which I wish to see as soon as possible receive two checks; and those of interest to several younger colleagues have the initials of those men put beside them. The List is then turned over to my secretary who makes out cards. These are grouped according to the marks. The first is filed away immediately, and forms a ready classified directory to the very recent literature. The second group goes in my pocket for an early trip to the library where reading is organized in a few minutes by arranging the cards according to journals. The third group of cards are turned over to the individuals whose initials are on the cards. Finally, the List is passed on to a colleague who, never having used the List, although knowing of it, now finds it of great value.

Very truly yours,

S. R. M. Reynolds
